

HyLite LED Introduces Seven New ENERGY STAR Rated Lamps

August 31st, 2017 - Fort Mill, SC

HyLite LED is excited to introduce Seven New ENERGY STAR Rated lamps. The New HyLite ENERGY STAR Series features A19, A21, BR30, PAR20, PAR30, & PAR38 Lamps. With HyLite's existing line of HID, Plug-in CFLs, and Fluorescent Tube retrofits, HyLite LED can now offer a complete range of LED Retrofit Lamps to customers for any indoor & outdoor application.

HyLite LED's New ENERGY STAR A-Series features highly-efficient A19 and A21 bulbs available in Soft White (2700K), Warm White (3000K) and Daylight (5000K) color temperatures. This New Series saves up to 85% in energy compared to incandescent bulbs. Available in GU24 & E26 bases.

The New ENERGY STAR 8W BR30 Lamp features a wide 120° beam angle and up to 113 lumens per watt for soft, uniform illumination in flood light applications. The New HyLite BR30 Lamp is suited to replace 65W lamps (88% Energy Savings) while providing years of maintenance-free operation and is available in both Warm White (3000K) and Daylight (5000K).

HyLite's ENERGY STAR PAR Series is suitable for damp locations and fully enclosed fixtures. With a 40° beam angle, HyLite LED PAR Lamps provide high-quality illumination even in high ceiling applications. The New HyLite LED PAR Series is the exact same physical dimensions as conventional PAR lamps allowing them to be used in any PAR20, PAR30, & PAR38 Fixture. Also available in Warm White (3000K) and Daylight (5000K), the HyLite LED PAR Series is suited to match any aesthetic.
