

HyLite LED Intigo Omni-Directional Lamp New Compact Retrofit Lamps Take the Guesswork Out of Upgrades

November 29th, 2017 - Fort Mill, SC

One of the biggest obstacles in retrofitting existing light fixtures is finding a LED lamp that will fit well in the existing fixture while providing the necessary levels of illumination. The new HyLite LED Omni-Directional (IOD) Intigo™ series removes the guesswork from upgrading existing 70W and 100W MH & HPS lamps. If the fixture is using a 70W or 100W MH/HPS lamp, the HyLite LED IOD Intigo™ will work.

HyLite LED's new ultra-compact Omni-Directional Intigo™ lamp can retrofit any existing fixture utilizing 70W or 100W Metal Halide Lamps. With an overall length of 5", the HyLite LED IOD Intigo™ lamp can work in virtually any type of light fixture including bollards, wall packs, flood lights, garage lights, canopy fixtures, wall sconces, jelly jars, and even traffic lights.

At 145 Lumens per Watt, the New HyLite LED IOD Intigo™ series offers up to 80% energy savings compared to MH/HPS lamps. With a rated life of up to 60,000 hours of life, the HyLite LED IOD Intigo™ last 3 to 5 times longer than HID lamps. Available in 3000K and 5000K, the HyLite LED IOD Intigo Lamp is the ideal retrofit for a variety of applications.

For more information on the new HyLite LED Omni-Directional Intigo™ visit HyLite LED's Website at www.hyliteledlighting.com
