

**Introducing the HyLite Intigo Post-Top LED
The Ideal Dark Sky Compliant Post-Top LED Solution**

December 14th, 2017 - Fort Mill, SC

Selecting LED Retrofit lamps for Post-Top applications can be a challenge for Engineers and Specifiers. Many LED Lamps produce too much uplight when installed in Post-Top applications while others fail to deliver light directly below the pole where it is needed the most. To solve these issues, HyLite has designed a lamp dedicated specifically to solve the issues specific to Post-Top lighting.

The new HyLite LED Post-Top Intigo™ Lamp minimizes wasted lumens with a light distribution that effectively illuminates roadways and Sidewalks with minimal uplight. The HyLite LED Post-Top Intigo™ features ultra-efficient 142 lumens per watt allowing it to replace 175W or 250W MH/HPS lamps with up to 80% Energy Savings.

At 60,000 hours of rated life, the HyLite LED Post-Top Intigo™ last up to six times longer than HID lamps. As a dedicated LED Post-Top Solution, HyLite provides FREE 20KA surge protection with each lamp as an additional level of protection from dangerous transients and power surges. Available in both 3000K and 5000K, the HyLite LED Post-Top Intigo is the ideal dark sky compliant solution for any Post-Top application.
