

HyLite LED Dimmable Bulbs & Lamps, Dimmer Compatibility List

The following List is based in part on information provided by the Dimmer Supplier and testing was done on a stable AC Power Supply in Laboratory, which may not be representative of your particular end-use Conditions. Applications and Conditions of use are many and varied and beyond our control, so purchasers and users should make their own determinations as to the suitability of a Lamp-Dimmer combination for their own particular application and use. Compatibility may also extend to Dimmers beyond this List, so performing an on-site Test before installation is strongly recommended.

For HyLite LED A19, 10W Bulb	
Brand	Model No.

HyLite LED Bulbs & Lamps have been tested for Compatibility to work flawlessly with the Dimmers shown above. HyLite is continually testing LED Bulbs & Lamps with various other Dimmers. We will continue to update the Dimmer Compatibility List as additional Models are tested.

Note: If the Dimmer Model does not appear on this List, it does not necessarily mean that HyLite LED Bulb or a Lamp is not Compatible with the Dimmer. It may be just that the Model has not been tested as yet. Please contact HyLite about any Dimmer not shown on this List.
